NOTE: Following the federal regulation changes, in 2000 Kentucky changed Developmental Disabilities from ages 3 through 5 to include children ages 3 through 8, which accounts for the noticeable increase in the number of students identified in this category.

NOTE: In approximately 1995, the federal government allowed attention deficit disorders to be added to the Other Health Impairment category. Prior to that time, ADHD/ADD were not included as educational disabilities, thus the increase in the number of children in this category.
